

Pankhuri Verma

Product Designer | M.S.C. in Human Computer Interaction

3+ years designing complex digital products, combining user research, systems thinking, and interaction design to create clear, intuitive, and scalable experiences.

WORK EXPERIENCE

Product Designer

Hyundai Motor Technical Center, UX Studio Frankfurt- Internship

April 2026 - September 2026, Germany

- Designed and validated next-generation EV and infotainment experiences through real-world research, journey redesign and interactive HMI prototyping, while contributing to cross-market research and future concepts for AI-driven in-car experiences.
- Evaluated how clearly the system communicated failures, alternative routes, charging options, and next steps, identifying UX gaps across routing, charging, and in-car guidance.
- Built and tested interactive ProtoPie prototypes integrated with an in-car simulator, validating proposed HMI concepts in realistic driving scenarios and translating findings into design improvements.
- Coordinated cross-market research on AI-driven in-car experiences across Hyundai UX Studios in Europe, Korea, China, and the US, translating findings into UX recommendations and future concepts.

Product Designer

Allianz Technologies - Working student

March 2024 - March 2026, Germany

- Designed scalable UI components, interaction patterns and accessible experiences for Allianz's global design system, supporting 10+ applications and 50+ teams while exploring AI-enabled design-to-code workflows and new product concepts.
- Defined accessibility guidelines aligned with WCAG and EAA standards, enabling 50+ teams to build compliant and inclusive experiences.
- Integrated Figma MCP into design-to-code workflows, making design-system components easier for AI coding tools to interpret and implement.

Product Designer

Deutsche Telekom - Internship

May 2023 - Nov 2023, Germany

- Co-designed and validated an internal digital product through usability studies across 20+ workflows, translating research findings into clearer journeys, stronger concepts and better-informed product decisions.

EDUCATION

Bauhaus University, Germany,

Oct 2022 - June 2026, GPA-1.5

MSC, Human Computer Interaction

Chitkara University, India

July 2017-July 2021, GPA-1.7

B.Tech Computer Science,
Minor in UX Design & User
Research

Design Skills

- UX Research
- Information Architecture
- Visual Design
- Prototyping
- Design Thinking
- Usability Testing
- Product Strategy
- Complex Workflow Design
- Design Documentation

Tools & Technologies

- Figma
- Adobe CC
- Sketch
- Protopie
- Framer
- Google Analytics
- Miro
- Claude Code
- Cursor
- Generative AI
- HTML
- CSS
- JavaScript

- Conducted usability studies across 20+ workflows (onboarding validation, use-case creation etc), driving UX improvements that streamlined user flows and improved task completion.

Languages

English (C1)

German (B1)

Product Designer

Cloudphysician Healthcare - Full-time

March 2022 - Sept 2022, Bangalore, India

- Designed a critical-care platform for ICU physicians, combining field research, interaction design, prototyping and a scalable design system to simplify complex multi-device clinical workflows.
- Worked with clinicians and engineering teams to ensure critical information remained clear and accessible in time-sensitive clinical scenarios.
- Created production-ready Figma designs, prototypes, and documentation, working closely with developers from design through implementation.

Product Designer

Mindstix Software Labs, Design Agency - Full-time

Feb 2021 - March 2022, Pune, India

- **Reckitt Benckiser:** Led end-to-end UX design for global clients including Reckitt Benckiser and Amway, using research, ideation, prototyping, usability testing and A/B testing to create scalable B2B and enterprise experiences.
- Drove the end-to-end design process, using user research, usability testing, and A/B testing to validate concepts and iterate from early prototypes to final designs.
- **Amway North America:** Designed web-based internal tool, collaborating with CRM teams to standardize interaction patterns and streamline key user workflows.

Product Designer

Bajaj Finserv Health - Internship

Aug 2020 - Jan 2021, Pune, India

- Led end-to-end design of the Bajaj Health app, enhancing usability, streamlining user flows, and elevating visual design.
- Developed structured UX artefacts (user flows, personas, and prototypes) to align stakeholders and guide design decisions.
- Streamlined design-to-development handoffs by leading post-delivery validation workshops with engineering teams.
